### Cynomolgus Fc gamma RIIA/CD32a Protein

Description	
Source	Recombinant Cynomolgus Fc gamma RIIA/CD32a Protein is expressed from HEK293 with His tag at the C-Terminus.
	It contains Gln28-Pro208.
Accession	Q8SPW4-1
Molecular Weight	The protein has a predicted MW of 21.3 kDa. Due to glycosylation, the protein migrates to 30-40 kDa based on Tris-Bis PAGE result.
Endotoxin	Less than 1EU per μg by the LAL method.
Purity	> 95% as determined by Tris-Bis PAGE
	> 95% as determined by HPLC
Formulation and Storage	
Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.

Dissolve the lyophilized protein in distilled water.

# Storage

Reconstitution

-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3-6 months after reconstitution. 2-8°C for 2-7 days after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

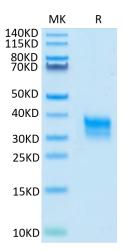

Centrifuge the tube before opening. Reconstituting to a concentration more than 100  $\mu g/ml$  is recommended.

### **Background**

The Fc gamma Rs have been divided into three classes based on close relationships in their extracellular domains; these groups are designated Fc gamma RI (also known as CD64), Fc gamma RII (CD32), and Fc gamma RIII (CD16). Each group may be encoded by multiple genes and exist in different isoforms depending on species and cell type. The CD64 proteins are high affinity receptors (~10e-8-10e-9 M) capable of binding monomeric IgG, whereas the CD16 and CD32 proteins bind IgG with lower affinities (~10e-6-10e-7 M) only recognizing IgG aggregates surrounding multivalent antigens.

## **Assay Data**

#### **Tris-Bis PAGE**

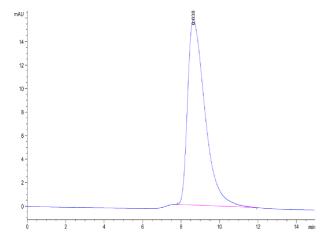

Cynomolgus Fc gamma RIIA on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Cat. No. CDA-CM132

# KAGTUS

# **Assay Data**

The purity of Cynomolgus Fc gamma RIIA is greater than 95% as determined by SEC-HPLC.

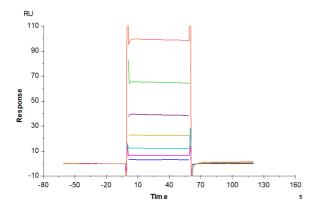

# Cynomolgus Fc gamma RIIA/CD32a Protein

Cat. No. CDA-CM132

## **Assay Data**

### **SPR Data**

Cynomolgus Fc gamma RIIA, His Tag captured on CM5 Chip via Anti-his antibody can bind Rituximab with an affinity constant of 4.39  $\mu$ M as determined in SPR assay (Biacore T200).
